TO: Dealer Parts Managers

Subject: 4HK1 and 6HK1 Remanufactured Long Block Engines Core Criteria

American Isuzu Parts Distribution Network (AIPDN) is pleased to announce the new core criteria for the new Remanufactured 4HK1 (5.2L) and 6HK1 (7.8L) Long Block Engines programs.

1. Core must be fully assembled.
2. Crankcase (oil pan) and valve cover must be present and in good condition. If the oil pan and/or valve cover are missing, \$175.00 will be deducted for each part missing.
3. All oil and coolant must be drained. This is a DOT and EPA regulation regarding transportation of hazardous materials. If the engine is not drained of oil and/or coolant, your Dealership will be charged \$100.00 for draining and disposal of these fluids, which will be deducted from the core credit.
4. Completed copy of the R.O. (repair order) must be attached to the Core. Failure to include or complete any or all required documentation including copies of repair orders, counter tickets, etc. which requires AIPDN to contact your dealership will result in a \$50.00 minimum administrative charge. AIPDN will contact the Dealer for the missing documentation and if it is not received in 24 hours from notification, the unit(s) will be rejected and the Dealer will be charged back for all related expenses.
5. A properly completed Core Return Tag must be attached. If the core return is related to a warranty repair, the Warranty Core Box must be checked.
6. Engine must be secured in the upright position on a pallet and enclosed.
7. All cores must be of the same type and application as the Long Block part number. Current scrap value will be credited to Dealers for cores which have been rejected.

AMERICAN ISUZU PARTS DISTRIBUTION NETWORK

Note: The preceding relaxed core criterion applies only to the 4HK1 and 6HK1 core part numbers listed in this bulletin.

Model Year	Model Application	Engine Description	Isuzu / GM P/N	Isuzu / GM Core P/N	Core Charge
2005-	N/W Series	4HK1 Long Block	8-97383-263-0 / 97383263	8-97383-263-C / 97729145	\$2000.00
