

# AVi555

## Internal Fan Alternator 12 Volt, 170 Amp

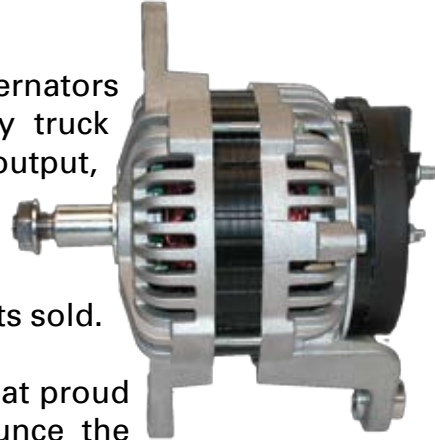

For Heavy Duty Class 5-8 Applications

# The New AVi555

## An Industry Standard - Reborn

For a generation, the Leece-Neville 555 (triple-nickel) alternators have set a benchmark against which all heavy duty truck alternators have been measured. Unsurpassed in output, durability and reliability, the original triple-nickel alternators have provided our customers with the security of a solid, stable product line that they have been able to trust for over 20 years, with millions of units sold.

Leece-Neville is now building on that proud heritage, and is pleased to announce the release of the new **AVi555** alternator.

Featuring an internal fan design, this compact unit provides the same maximum output as the original 555 in a package that reduces overall weight by over 16%.

The AVi555 has been designed from the ground up to fit a wide variety of applications, to give our customers the greatest flexibility with the fewest part numbers.

### Features / Benefits

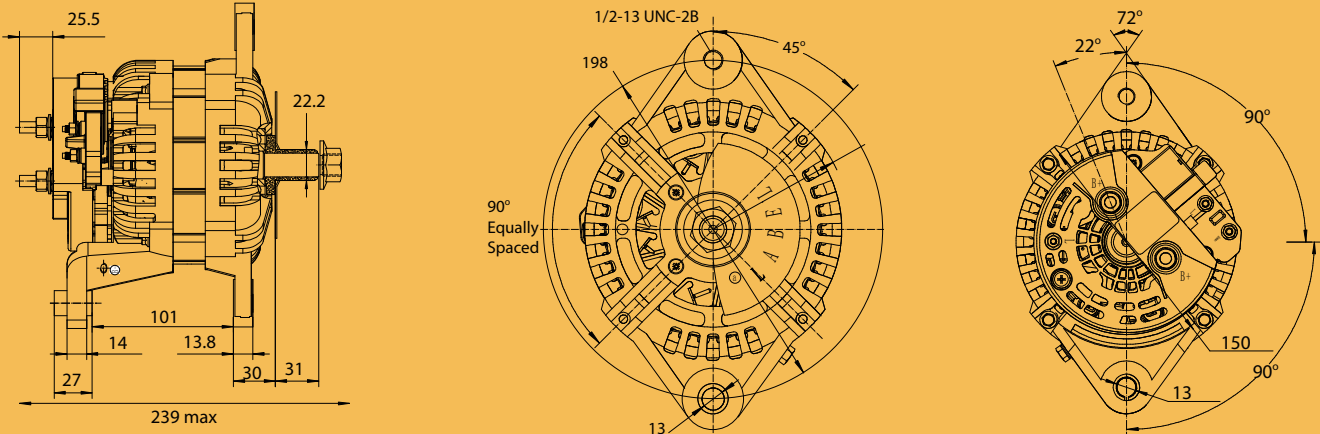

- Case ground
- High temperature rated
- 170 amp
- Lightweight
- Multiple locations for both B+ and B- connections

#### AVi555 Specifications

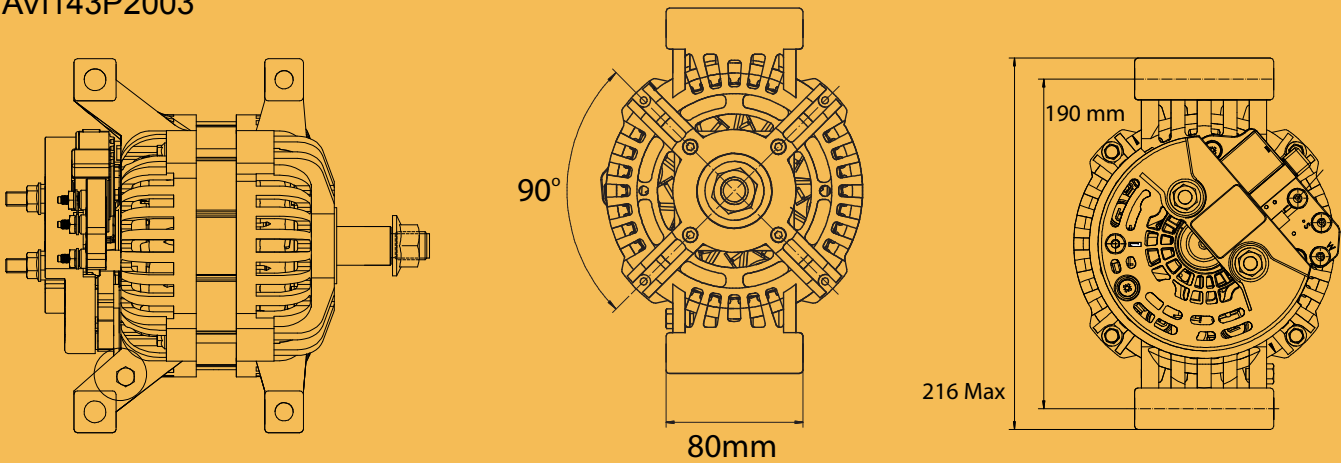

Performance	12 volt, 170 amp
Temperature limits	-20° C to 105° C
Maximum speed	6,000 RPM continuous 10,000 RPM maximum
Weight	16.3 lbs (7.4 kg)

Dimensions

AVi143J2001

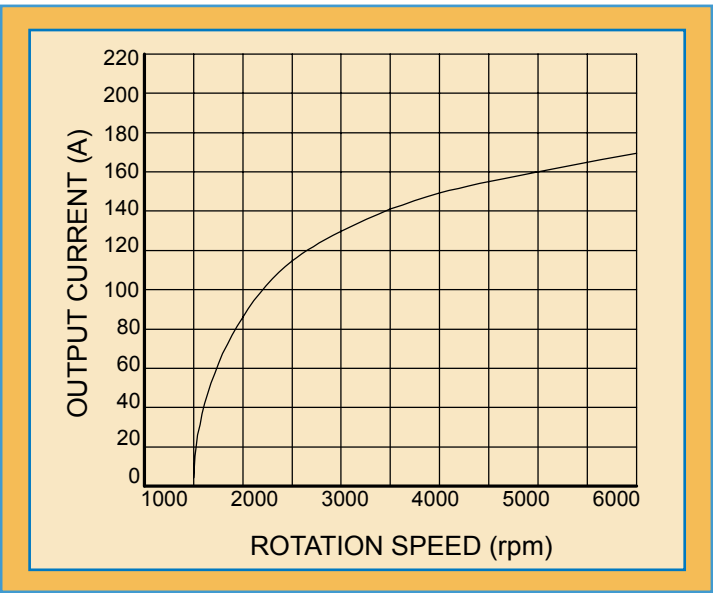

AVi143P2003

Output

AVi555
