

Faster Transactions

The Quick Order Processing menu displays four transactions which are now faster. The most significant changes are the screens for the following transactions.

- Upload from DMS
- Create Stock Order
- Change Sales Order
- Display Sales Order

The new user menu is displayed below.

Quick Upload from DMS-FLCC

To increase transaction speed, the **Show Availability** box has been removed. To perform a **Quick Upload From DMS-FLCC**, follow these instructions.

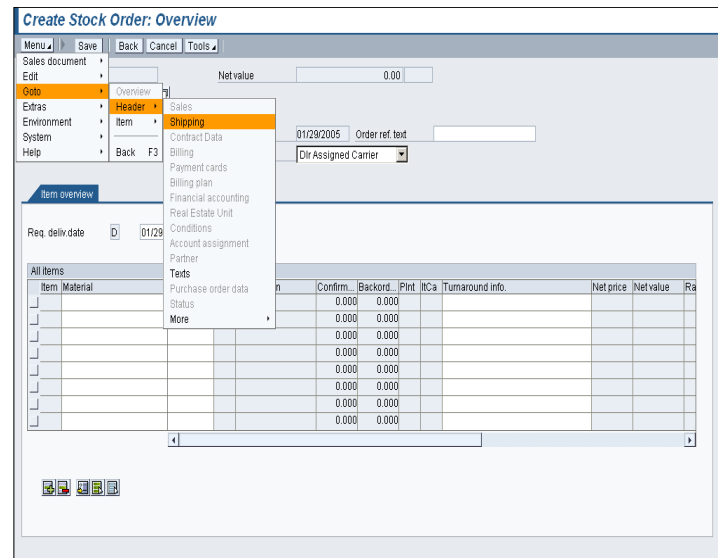

1. On the **User Menu**, double-click **Online Quick Order Processing**.
2. Double-click **Quick Upload From DMS-FLCC**.
3. Follow the directions in the Dealer Workspace Guide to complete the DMS upload.

New process for pending block

The **Create Stock Order** screen no longer displays a sales tab for placing a pending block.

To place a pending block

1. Go to **Menu**.
2. Click on **Goto/Header/Shipping**.
3. Select the appropriate pending block.

Removed Columns

Please note the following columns have been removed from the screens used for Creating a Stock Order, Changing and Displaying a Sales Order.

The removed columns include

- per
- UOM
- Cnty
- weight unit
- volumn unit
- Keys & locked indicator
- Materials group 4
- DGIndProfile

Turnaround Field

The Turnaround Field has been moved to the left so that it is easier to view. This field is now in the 9th column.
